

configurator retrofit

Renault Store technical specifications

March 2024 – v1

description

The “configurator” must allow customers to specify their choice in term of body colors and upholstery.

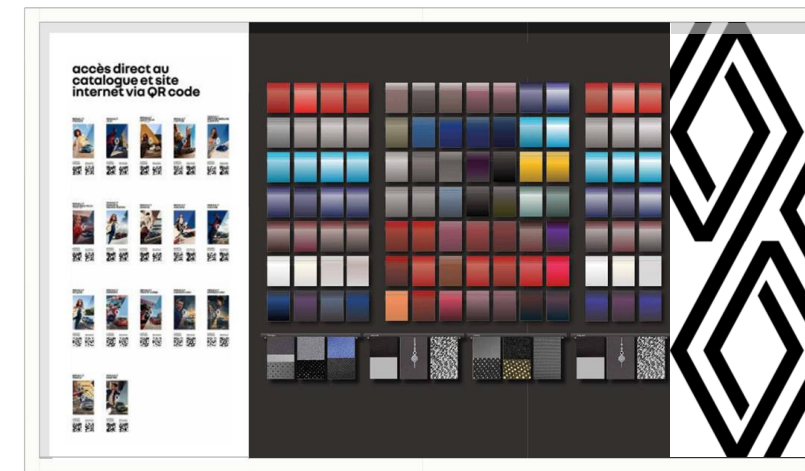

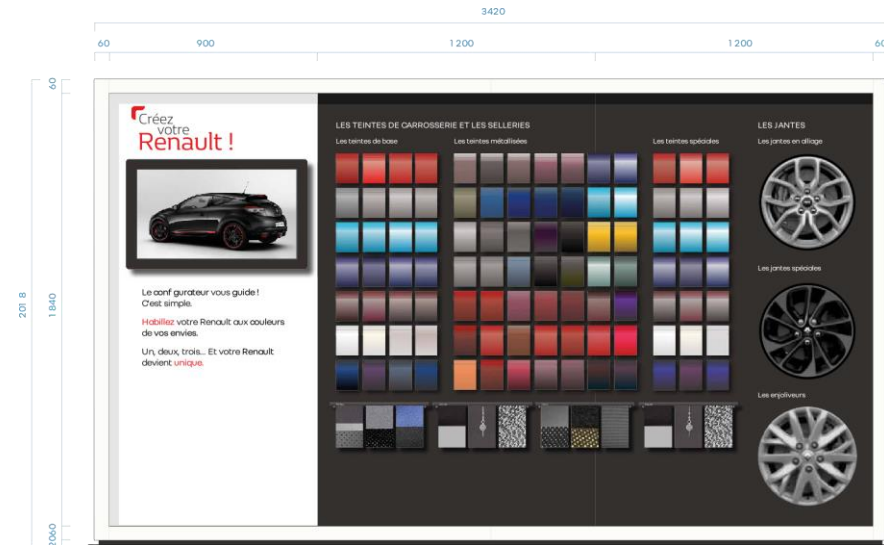

The furniture displays color samples of body and upholstery.

Vehicle configuration is now carried out on the sales advisor's computer station, so the screen for the “3D configurator” need to be removed

With the retrofit, the configurator will be an upholstery & color- palette unit

retrofit

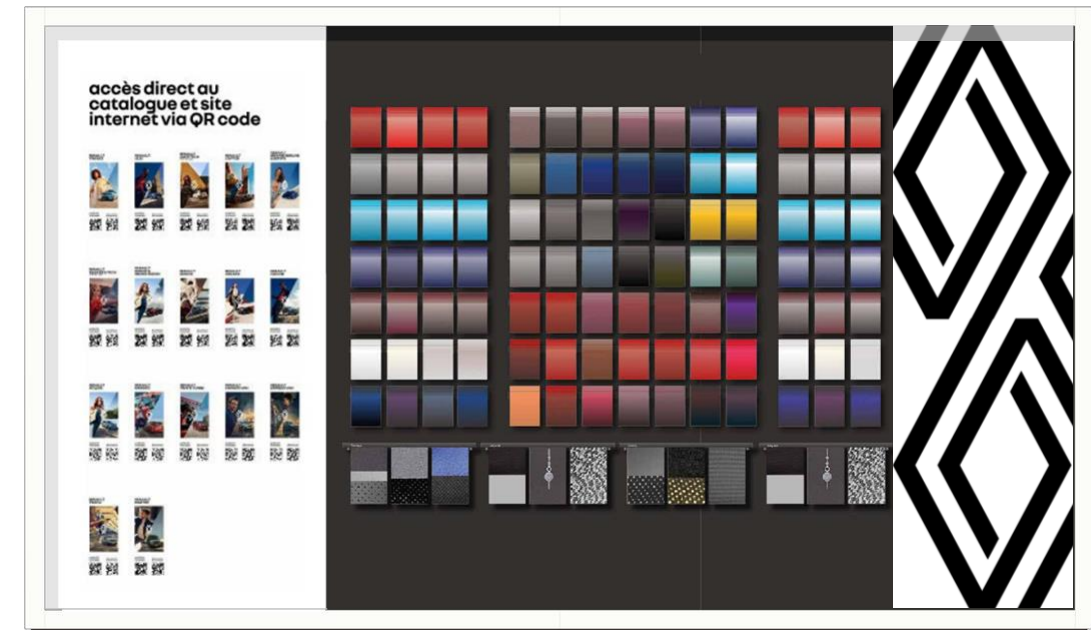

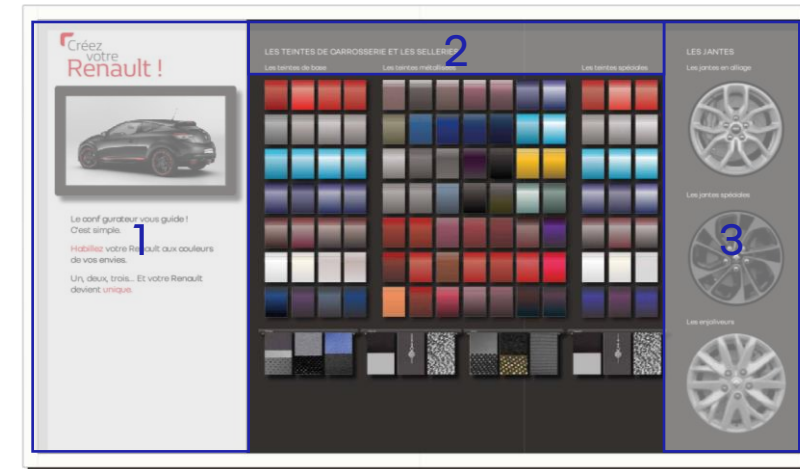

- remove TV screen
- remove stickers in the center part
- remove wheels
- affix pvc white panel on the 2 sides with specific stickage
- verify that all body colors and upholstery are updated

retrofit

1. remove TV screen
2. remove stickers in the center part
3. remove wheels
4. affix PVC white panel, th. 3 mm, on the 2 sides with double-sided tape
 - left: 900 x 1880 mm *
 - right: 580 x 1880 mm *
5. stickers
 - left: QR code kakemono content (need to be adapted to use all the place) – removable sticker or printed on pvc
 - right: black graphical line – printed on pvc or permanent stickers
6. verify that all body colors and upholstery are updated

** please verify the dimension on site (it can depend on supplier)*

QR code kakemono

the left panel is an adaptation of the QR code kakemono. The content is the same.

So, for showroom with the configurator unit that has been retrofitted, the QR code kakemono is no more useful.

warning

before every vehicle launch, don't forget to:

- update the left panel with new sticker or new printed pvc panel for range evolution
- update all body colors and upholstery
