

Technical specifications for Alpine Centers

January 2022 - v1e

preamble

This document presents the new components used in the identification and development of Alpine Centers.

1.	new facades	5
2.	exterior components	11
3.	interior components	34
4.	standard furniture	53
5.	showroom	60
6.	IT material	81

what is this document for?

An evolution of facades and interior design

The Alpine brand has chosen to gently evolve its visual identity and smoothly modernize the components present in the Alpine Centers.

This development concerns the identification of Alpine Centers and the interior design of the showroom.

The definition of the identification and development components

This document presents and describes the new components used in the context of the different configurations of the Alpine Centers.

signage evolution

Generic principle

The identifiers of the Alpine brand evolve in particular in terms of the colours and the signature used on the main facades of buildings.

- 1 The current facade.
- 2 The new facade.

1 new facades

To return to the general summary,
click on the button.

typology of implementations

Generic principle

The components are developed to meet 4 types of implementation:

- the Alpine box,
- the urban showroom,
- the multi-brand site with 2 brands,
- the multi-brand site with 3 brands.

Alpine Box

Urban showroom

Multi-brand site with 2 brands

Multi-brand site with 3 brands

The Alpine Box

Evolution

- 1 The new Alpine signs on the blue facades are in white letters.
- 2 The Alpine totem has midnight blue faces and a white emblem.

Current facade

New facade

1

2

the Alpine urban showroom

Evolution

- 1 The new Alpine sign on the facade is in white letters on the blue facade.
- 2 The Alpine flag sign adopts midnight blue faces and Alpine lettering in white letters.

Current facade

New facade

1

2

the multi-brand site with 2 brands

Evolution

- 1 The new Alpine sign on the facades is in white letters on the midnight blue background.

Current facade

New facade

1

the multi-brand site with 3 brands

Evolution

- 1 The new Alpine sign on the facade is in white letters on the midnight blue background.

Current facade

New facade

signage materials

Principle

The opposite elements describe the recommended materials for the realization of the signage elements.

Pantone night blue 296C
equivalent to RAL 5011

Aluminum sheet or
prepainted ACM in satin
finish at 40% gloss.

Dark grey RAL 7021

Prepainted aluminum in
40% satin finish.

Satin black

Prepainted or post-
lacquered aluminum in a
40% gloss satin finish.

Matt white

Two-component epoxy
paint in matt finish.

Pantone Red 485 C

Printing on diffusing white
adhesive laminated on
white PMMA.

Matt metallic gold

Adhesive markings for
glazed parts.

Brilliant white

White PMMA diffusing at
40% light transmission,
glossy finish, ref. 100-
27000.

Pantone Blue 3002 C

Printing on diffusing white
adhesive laminated on
white PMMA.

facade marking

outlines

Description

The opposite drawing allows the precise positioning of the facade marking component elements.

The neutrality zone optimizes the visibility of the signature while preserving its visual integrity.

Key

- 1 Pantone blue background 296 C
- 2 Pantone Blue 3005 C
- 3 Pure white
- 4 Pantone Red 485 C
- 5 White letters

facade marking

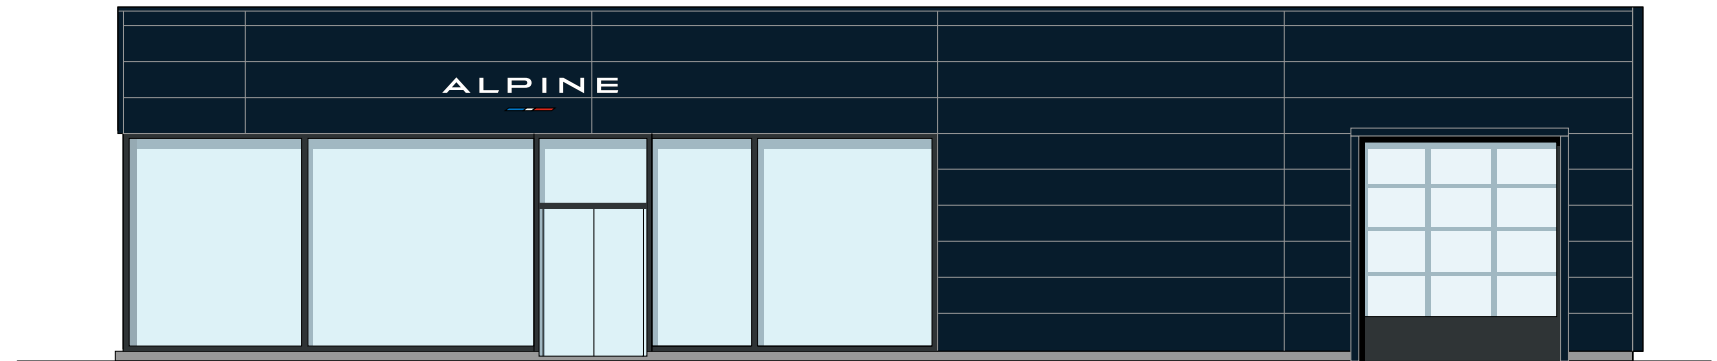

positioning on facades

Principle

The sign is located directly on the main facade and the secondary facade centered in relation to the windows.

It is aligned with the bottom of the cladding overhanging the glazed part.

- The letters and the flag are directly placed on the facade without the presence of an intermediate structure requiring passage of power supplies behind the cladding with an individual power supply for each letter.
- In the event that the power supply is made at a single point, the signature is placed on a blue tablet sheet intended to hide the power supplies for each of the elements of the light signature (letters and flag).

facade marking

dimensions

General technical principle

Illuminated sign in box letters with integrated LED lighting with diffusing white PMMA face.

Flag made in one piece according to the same principle with diffusing white PMMA face and adhesive printed in red and blue.

Dimensions: th.70 x h.250 x L.2918mm

key	H	L	a	b	c	d	e	f	g	h	i	j	k	A	B	C	D	E
dimensions	250	2918	472	145	326	142	398	177	67	214	411	214	350	1045	357	146	325	45

facade marking

description

General technical principle

Illuminated sign in box letters with integrated LED lighting.

Dimensions: th.70 x h.250 x L.2918mm.

Technical details

- 1 Front panel in diffusing white PMMA, at 40% light transmission, 3 mm thick, glossy finish.
- 2 Sheet steel edge th. 1mm, letter depth 70mm, matt black colour. Interior coated with matt white adhesive.
- 3 Back in white PVC th. 13 mm.
- 4 Chain led IP67, white 6500 ° K, luminance 350 cd /m².

facade marking

letter making details

Description

- 1 External converter to the letter installed in the upper part of the facade
- 2 Bottom of the letter in white expanded PVC 10 or 13 mm thick
- 3 Chain white LEDs, rated IP67, 6500 ° K, luminance 350 cd/m²
- 4 Edging in 10/10 mm thick aluminum sheet, interior finish in matt white adhesive, matt black lacquered finish.
- 5 Face of the letter in diffusing white PMMA, th. 3 mm, assembly with the edge by transparent acrylic gluing.

facade marking lighting

General technical principle

This recommendation is made on the basis of a 30 lumen module with a luminous efficiency of 90 to 100 lumens / watts.

The instruction remains indicative and will require, for each letter, a validation and a test of compliance with the performance objectives indicated in this document.

- Temperature: 6500 ° K, cold white
- Power supply: 220 volts
- Converter: 12 volts, constant current
- Module: LEDIT OPTIKA 30 HL1 WDL IP67
- 55 modules
- Power: 16.5 watts
- Area: 0.480 m²
- Luminance: 350 cd / m² with a minimum of 300 Cd/m².
- Light output reduced by 70% after 70,000 hours of operation.
- Minimum guaranteed life: 7 years

facade marking

back of the sign

Description

The opposite drawing describes the principle of structure and cladding with raised edge panels to be made to place the signature when the electrical supply can only be done at one point requiring the masking of the power cables of each letter (and flag).

Key

- 1 220 v electric inlet (one point).
- 2 Integrated 12v converter.
- 3 Covering of the structure in 20/10 aluminum sheet metal with 4 flanged edges, Pantone 296 C blue lacquered in satin finish, made in a single panel.
- 4 Welded structure in raw aluminum profile. Resumption on masonry or cladding by stainless steel screws.
- 5 Illuminated lettering in letters-box fixed on the aluminum face.

flag insignia presentation

Key

- 1 Face in midnight blue lacquered aluminum Pantone 296 C.
- 2 Alpine lettering in backlit white PMMA. PMMA tape with adhesive diffusing 3 backlit colours. Marquetry inlay
- 3 Plate cover in RAL 7021 lacquered aluminum sheet in satin finish
- 4 RAL 9003 white lacquered aluminum edges in satin finish.

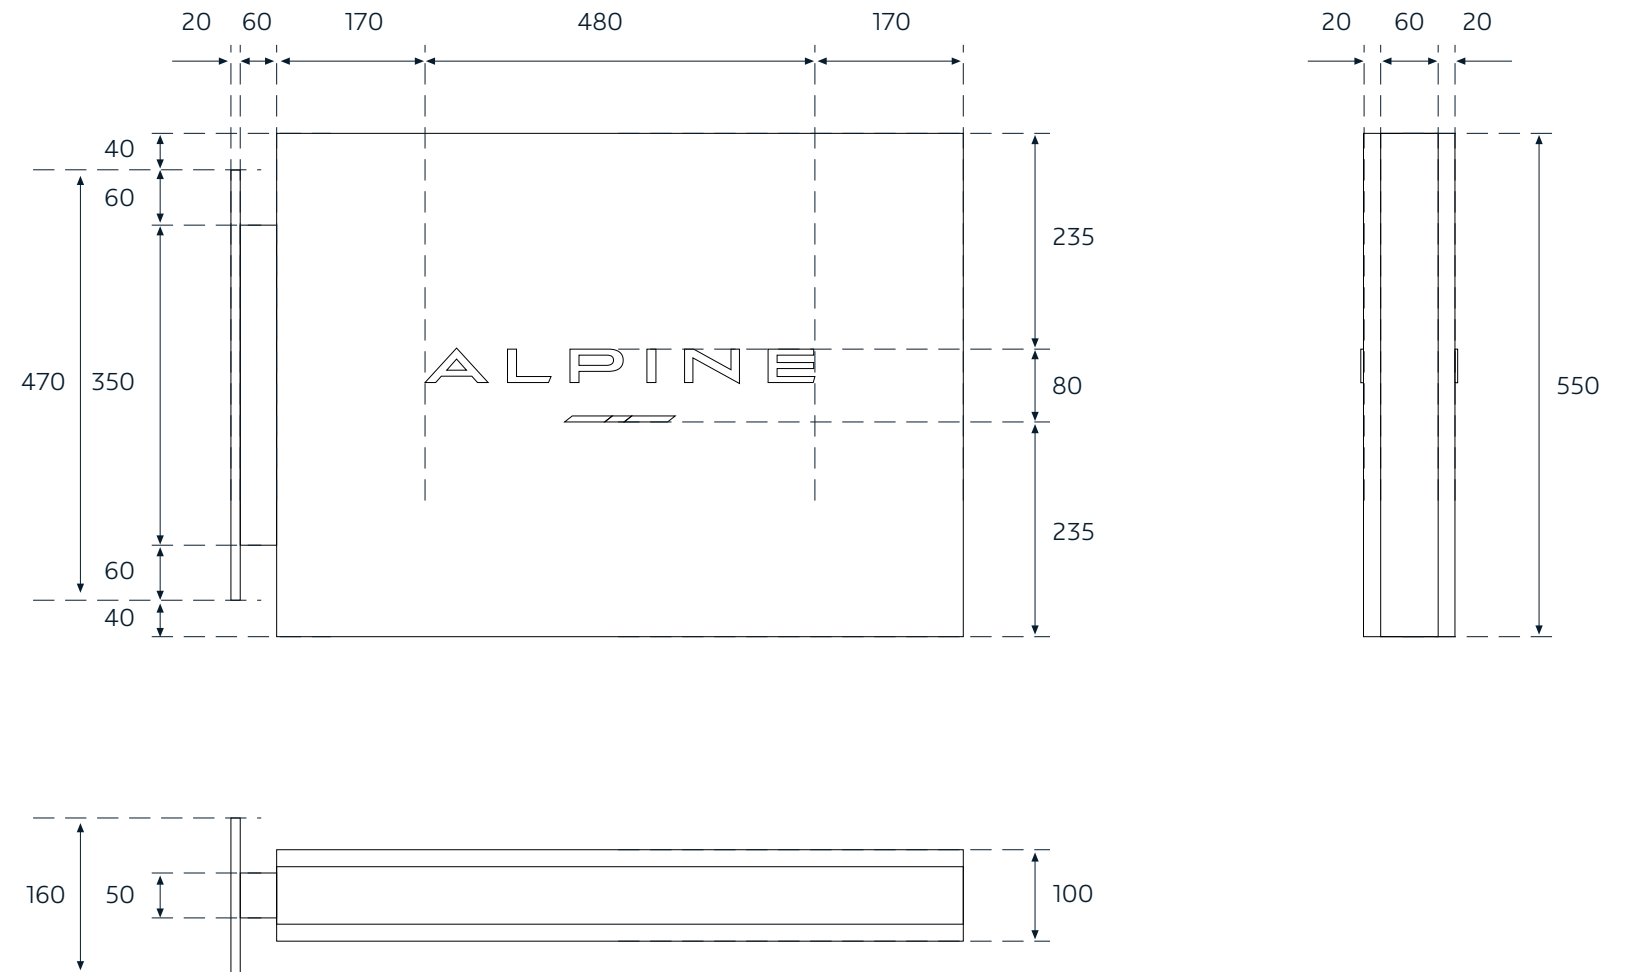

flag insignia

dimensions

Description

Illuminated sign with integrated LED lighting.

Dimensions: l.900 x h.550 x th.100mm.

Test Drive totem presentation

Key

- 1 Face in midnight blue lacquered aluminum Pantone 296 C.
- 2 Alpine lettering in backlit white PMMA. PMMA tape with adhesive diffusing 3 backlit colours. Marquetry inlay.
- 3 Plate cover in RAL 7021 lacquered aluminum sheet in satin finish.
- 4 RAL 9003 white lacquered aluminum edge in satin finish.

Test Drive totem dimensions

Description

Luminous totem with integrated LED lighting.

This element is double-sided backlit.

Dimensions: l.1400 x h.2300 x th.160mm.

Alpine totem presentation

Description

Double-sided light totem with integrated LED lighting.

4 mm ACM face and aluminum sheet edges.

Installation on concrete block by anchoring rods and recovery on plates welded to a steel structure protected by galvanization.

Dimensions: l.1408 x h.6500 x th.240mm.

Key

- 1 Face made in a single part in ACM 4 mm midnight blue lacquered Pantone 296 C with raised edges of 40 mm.
- 2 Alpine emblem in backlit white PMMA. Marquetry inlay
- 3 Plate cover in RAL 9004 black lacquered aluminum sheet in satin finish made of 2 symmetrical parts.
- 4 RAL 9003 white lacquered aluminum edges in satin finish.

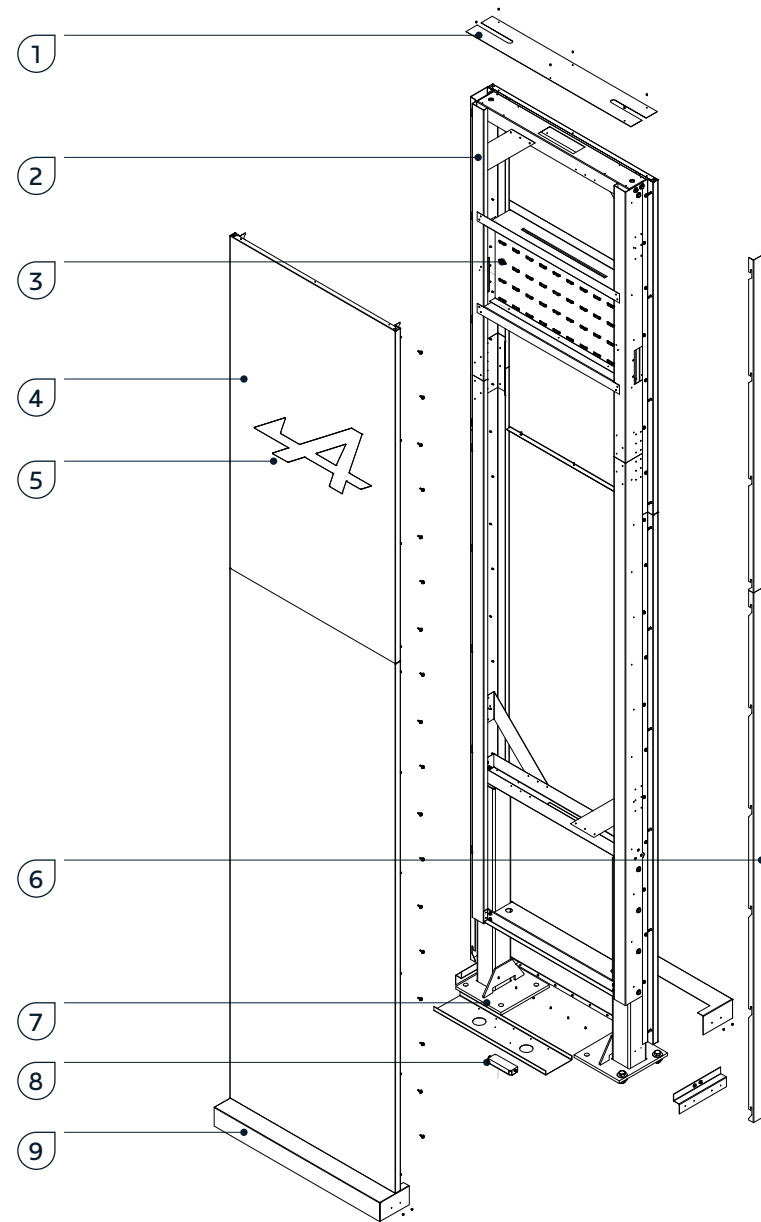

Alpine totem

exploded view

Key

- 1 Aluminum sheet top cover
- 2 Galvanized sheet steel structure. Omega posts with stiffeners.
- 3 Light box serving as reflector with LED equipment in matt white aluminum.
- 4 Cut-out aluminum upper face with Alpine emblem in white PMMA
- 5 Diffusing white PMMA emblem integrated in marquetry in the face.
- 6 White lacquered aluminum edges
- 7 Steel plates for recovery on concrete block.
- 8 12V converter
- 9 Aluminum plate cover

Alpine totem

manufacturing details

Key

- 1 Light box
- 2 General cut
- 3 Attachment studs on the front faces
- 4 Attachment of the side faces with raised edges.

After-sales plate presentation

Description

Non-illuminated plate made of shelf sheet metal.
Direct fixing to the wall by stainless steel screws.
Dimensions: l.600 x h.750 x th.40mm.

Key

- 1 Front in Pantone 296 C midnight blue lacquered aluminum in satin finish.
- 2 Alpine lettering cut out of white adhesive in matt finish.
Adhesive tape printed in 3 colors.
- 3 Pantone 296 C midnight blue lacquered aluminum edges in satin finish.

car park markings presentation

Description

Marking of parking spaces in white paint.

Marking of the Test Drive area in white paint.

Key

- 1 Car park spaces.
- 2 Test Drive area.

car parks and Test Drive area outlines

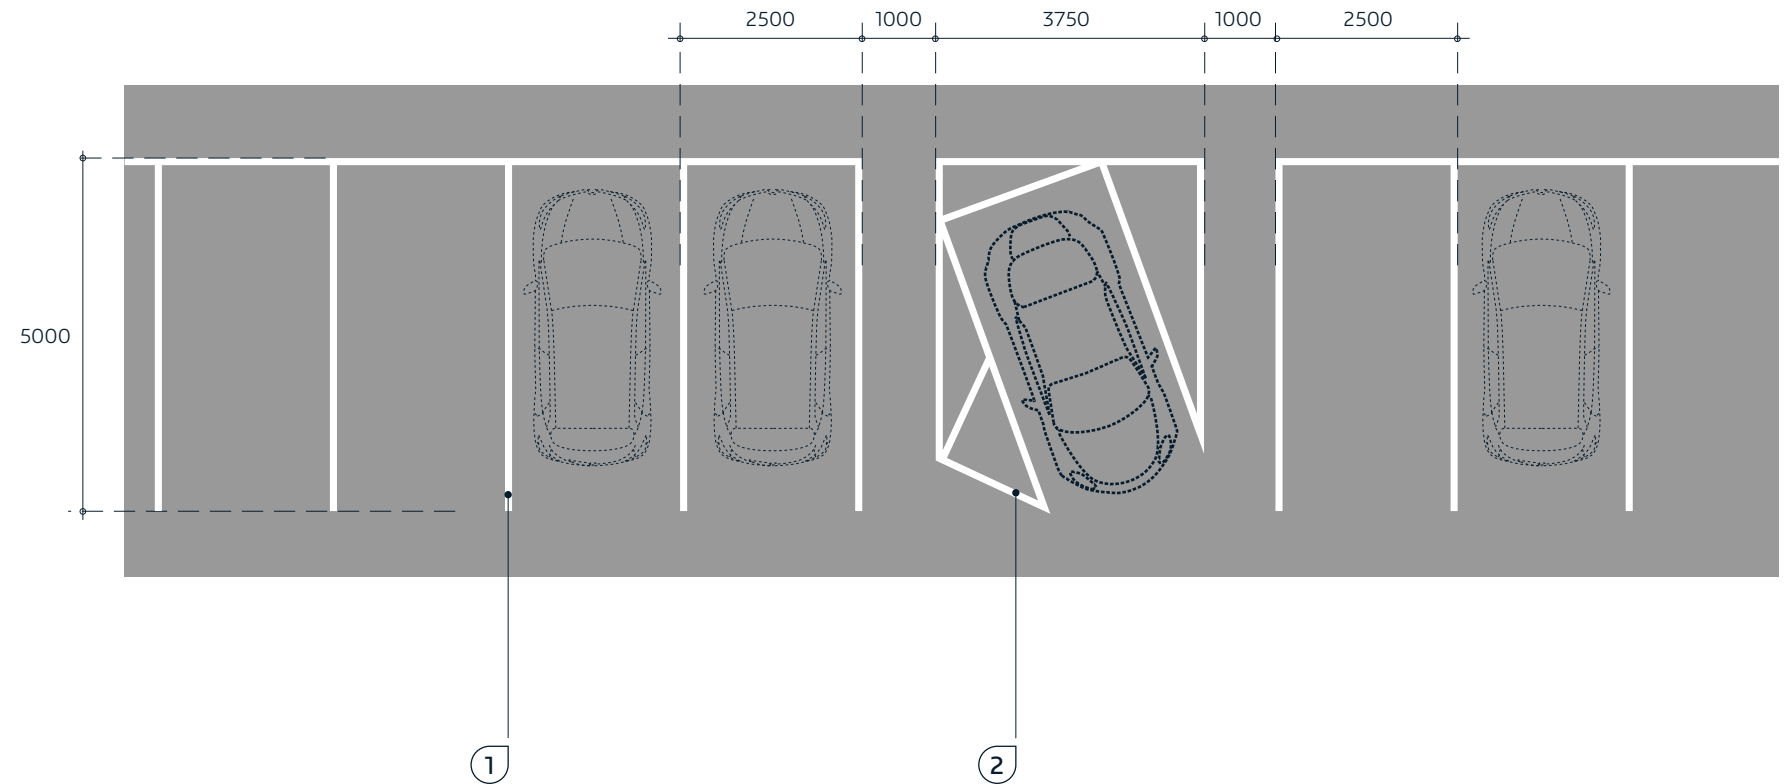

Description

Marking of parking spaces in white paint.

Marking of the Test Drive area in white paint.

Key

- 1 Car park spaces
- 2 Test Drive area.

car park markings

outlines of the Test Drive zone

Description

Marking of the Test Drive zone in two-component epoxy white paint done with a stencil.

window markings

presentation

Description

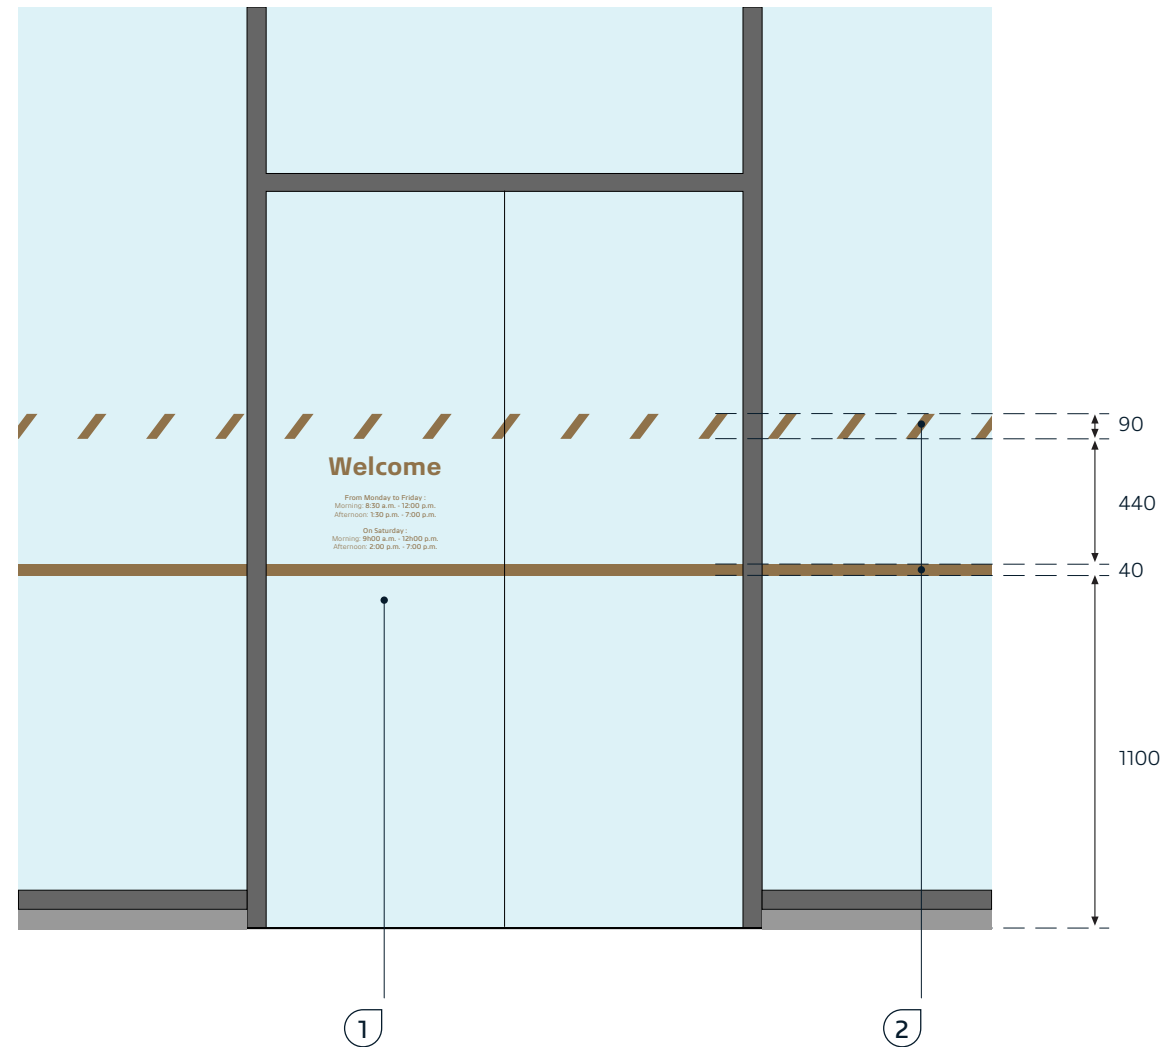

Window markings made with gold adhesives meet regulatory obligations:

- highlighting of the glazed parts,
- display of showroom opening hours.

The adhesive marking must always respect the recommended orientation of the pattern.

Key

- 1 Adhesive entrance markings in matt metallic gold adhesive.
- 2 Adhesive window marking in matt metallic gold adhesive.

window markings

outlines of entrance markings

Description

Entrance markings are made with a matt metallic gold adhesive cutout (letter to letter) placed inside the showroom for better protection.

Key

- 1 Mention "Welcome" in Alpine Ascension Bold typography, centered, upper case on the first letter,
- 2 Secondary terms "Morning" and "Afternoon" typography Alpine Ascension Regular, capital letter on the first letter,
- 3 Mention of opening times and days in Alpine Ascension Regular typography, capital letter on the first letter,

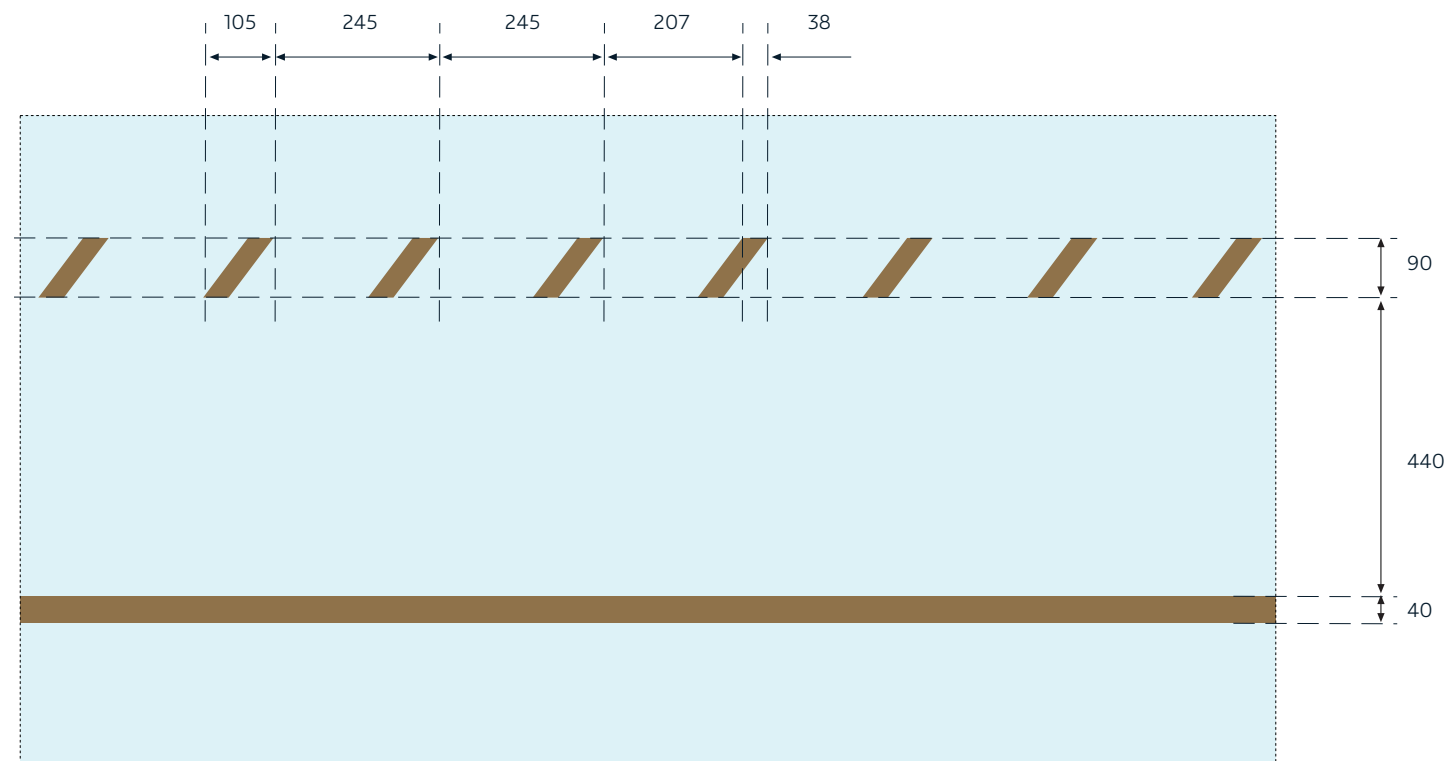

window markings

outlines

Description

The markings are made by cutting matt metallic gold adhesive placed inside the showroom for better protection.

3

interior components

To return to the general summary,
click on the button.

the interior design materials

Principle

The opposite elements describe the materials recommended for the realization of the interior design components.

Laminate veneer

Particle boards or MDF th. 18 mm veneered in Unilin Aneto Walnut H581 laminate.

Midnight blue satin

Pantone 296C blue post-lacquered aluminum sheet in 40% gloss satin finish.

Matt black RAL 9004

Axalta Fine textured signal black powder paint.

Laminate type EGGER U999 PT matt black.

Matt light grey

Levis grsi subtle sesame wall paint.

Anodized aluminum

Natural tint.

Matt midnight blue

Adhesive ref. 3M PS-1825 on laminate veneered surfaces.

Wall paint in matt finish.

White Corian

Glacier white synthetic resin in 240 grain matt finish.

Matt white

Mass-tinted adhesive in matt finish.

Printing on ACM

Direct printing on ACM panels with matt finish.

Printing on fabric

Printed on fine mesh polyester fabric in matt finish.

visuals

outlines

Description

Printed visuals on stretched canvas or on dibond.

Key

- 1 3 mm thick dibond panel, raw edge.
- 2 Panel in stretched polyester fabric in matt finish mounted on aluminum profiles with natural anodizing finish.

Hexachromy or octochromic printing with matt finish.

h.2500 x l.1250

h.2070 x l.1600

h.600 x l.700

h.350 x l.600

h.450 x l.700

h.800 x l.700

Printed visuals on canvas mounted on aluminum frame

①

Printed visuals on dibond

②

interior sign presentation

Description

Backlit sign offset from the wall by 20mm spacers with lighting by chain leds to the flow directed towards the wall.

- Front face and edges in brushed stainless steel, thickness 1mm.
- Black edge in black lacquered sheet RAL 9004, thickness 40mm.
- Rear face in diffusing white PMMA mounted on brushed stainless steel spacers, 20mm offset from the wall.

Key

- 1 Wall painted in grey matt finish.
Ref. LEVIS Subtle Sesame.
- 2 Wall sign.
- 3 RAL 9004 black lacquered aluminum plinth in matt finish.
Dimensions: 950 x 1950 x 40mm.

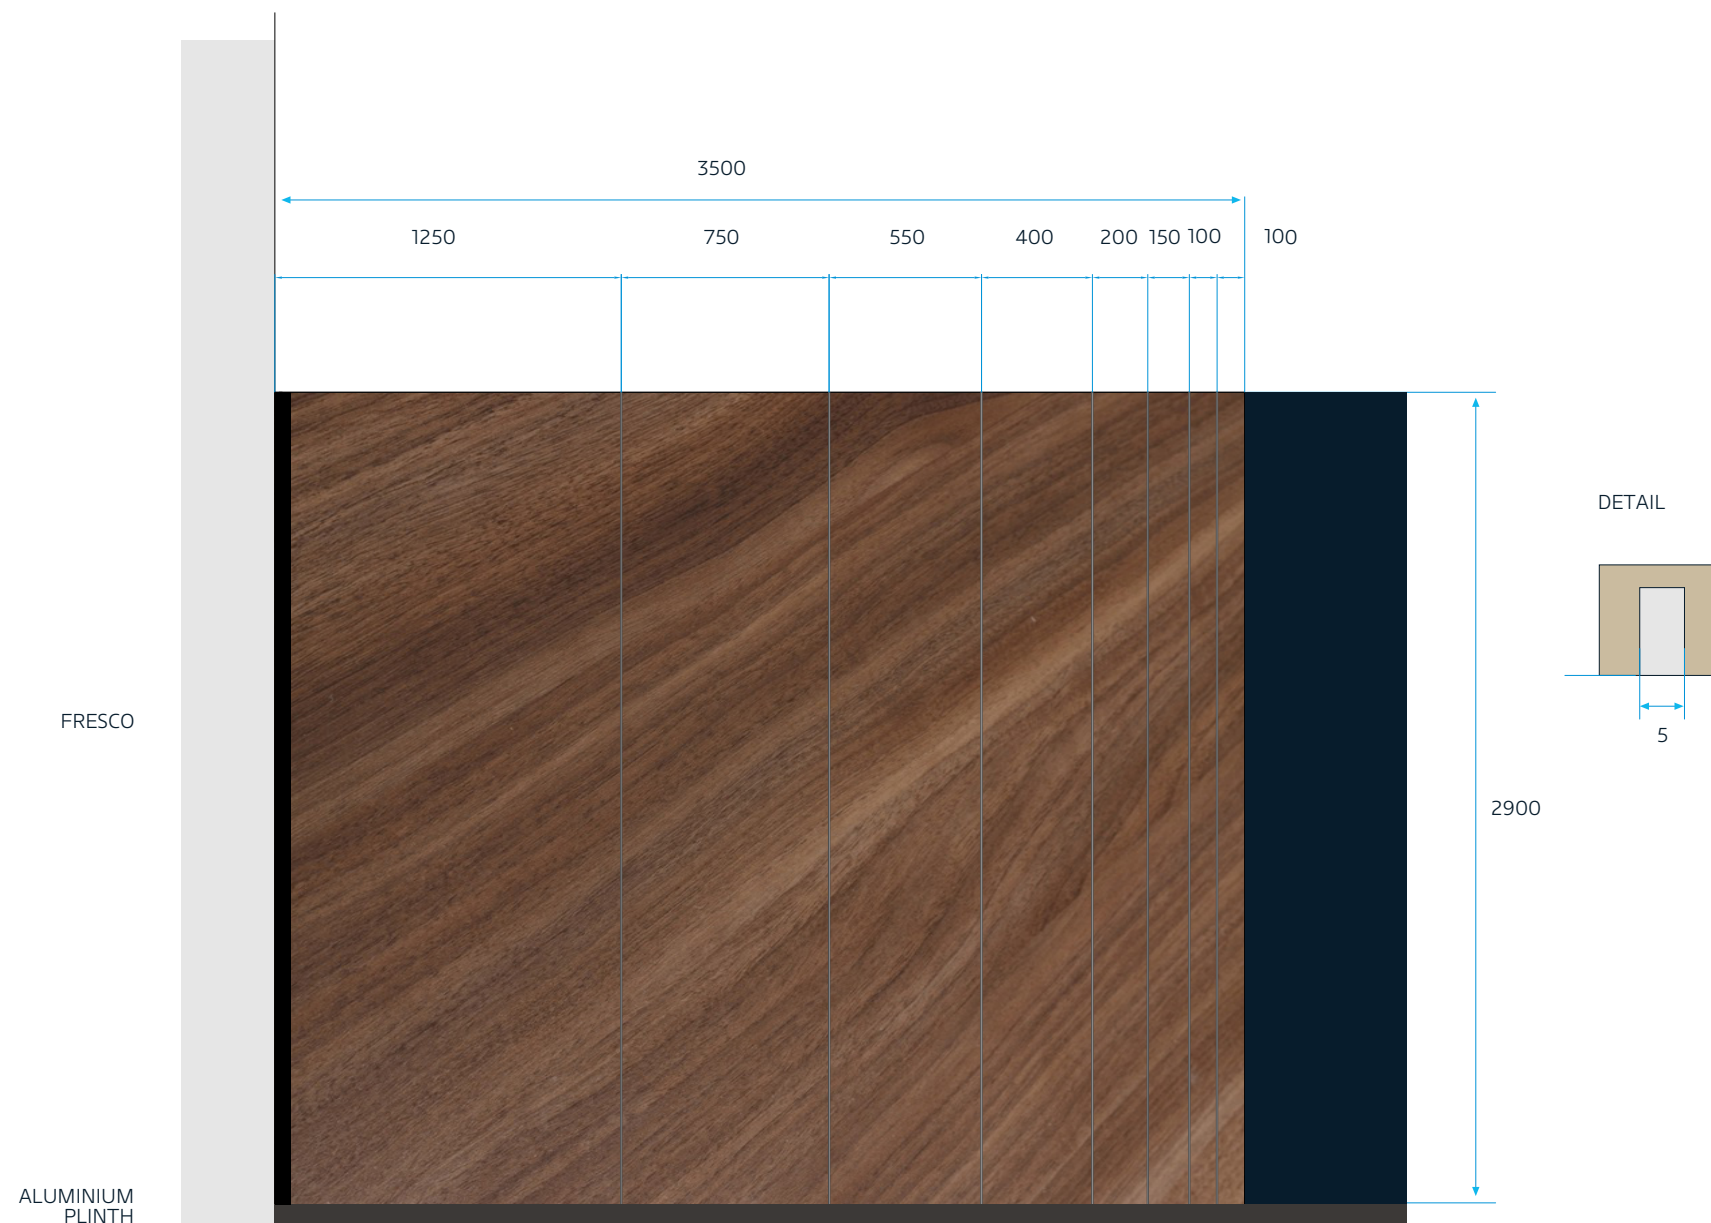

wooden wall cladding presentation

Description

Cladding on wood frame in particle boards with Unilin Aneto Walnut H581 laminate veneer finish with 5 mm aluminum inserts protected by natural anodization and flush with the wood surface (see detail opposite).

Finishing of the lower part made by the plinth in matt black lacquered aluminum profile h. 100 x 20mm.

Standard format: h. 2900 x l. 3500mm

Mountain fresco presentation

Description

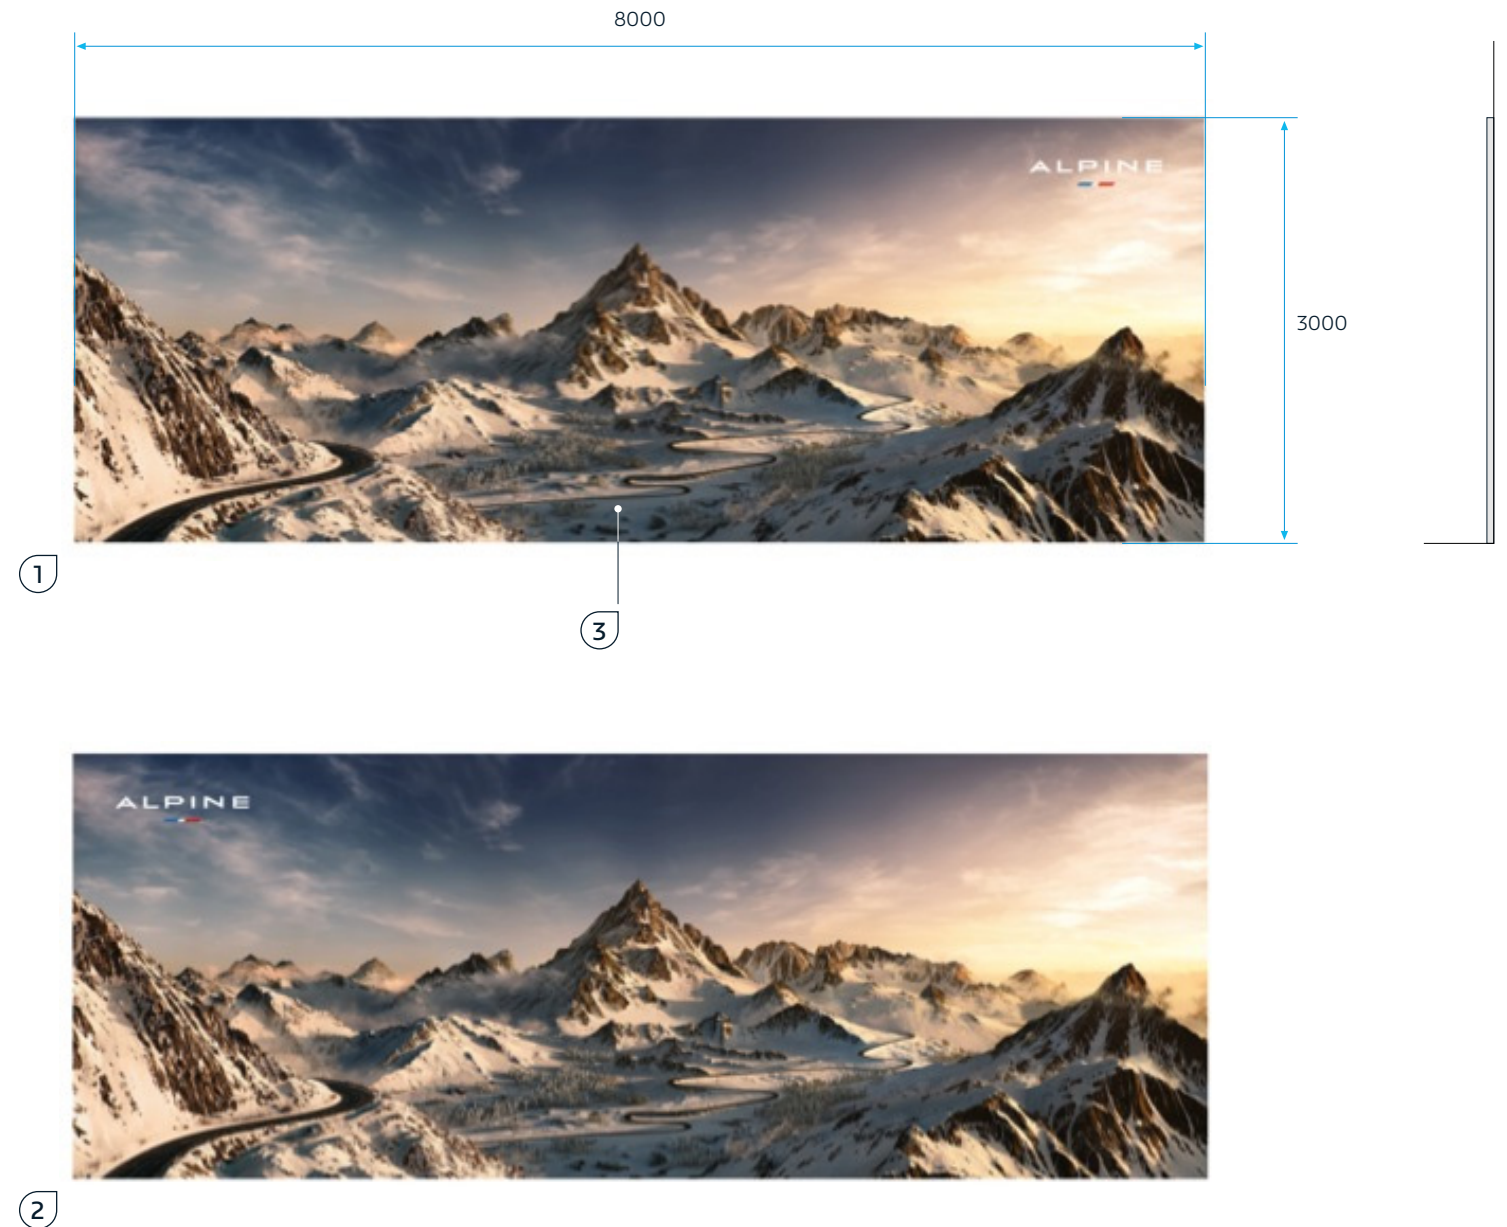

Visual printed on stretched canvas mounted on an aluminum frame offset from the wall.

Dimensions: 8000 x 3000 x 50mm.

2 versions with different positioning of the Alpine signature.

Key

- 1 Variation with signature on the right
 - 2 Variation with signature on the left
 - 3 Front panel in stretched polyester fabric in matt finish mounted on aluminum profiles with natural anodizing finish.
- Hexachromy or octochromy printing.

communication

Atelier Alpine and Jean Rédélé texts

Description

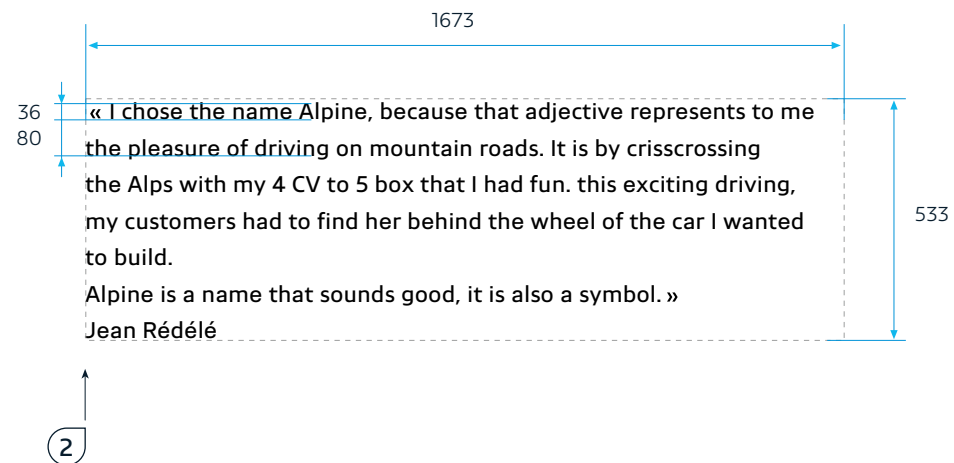

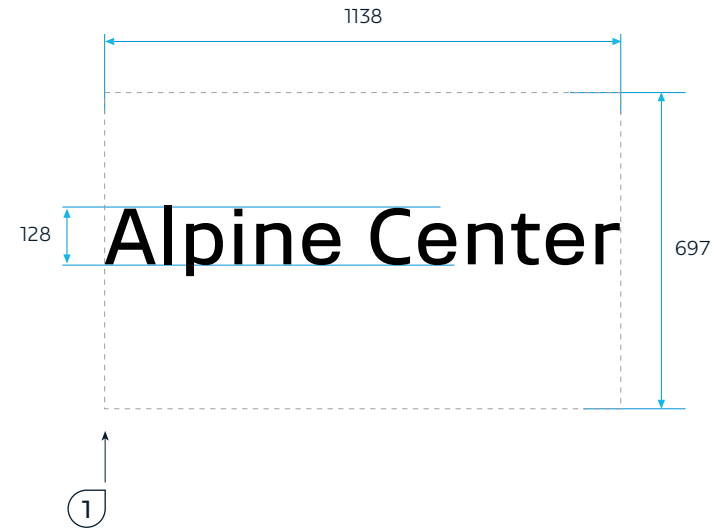

Letters cut from matt white adhesive, ref. 3M 100-10 on midnight blue wall.

Laying in pavet of texts with transfer film after stripping.

Alpine Ascension Regular typography in iron on the left.

Key

- 1 Alpine Center text,
Alpine Ascension Regular typography aligned on the left.
- 2 Jean Rédélé text,
Alpine Ascension Regular typography aligned on the left.

communication

Right wall and Chronological dates texts

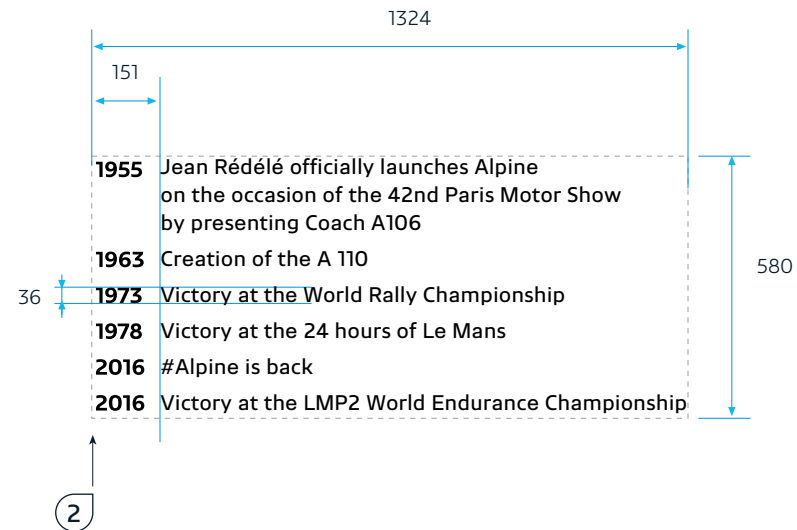

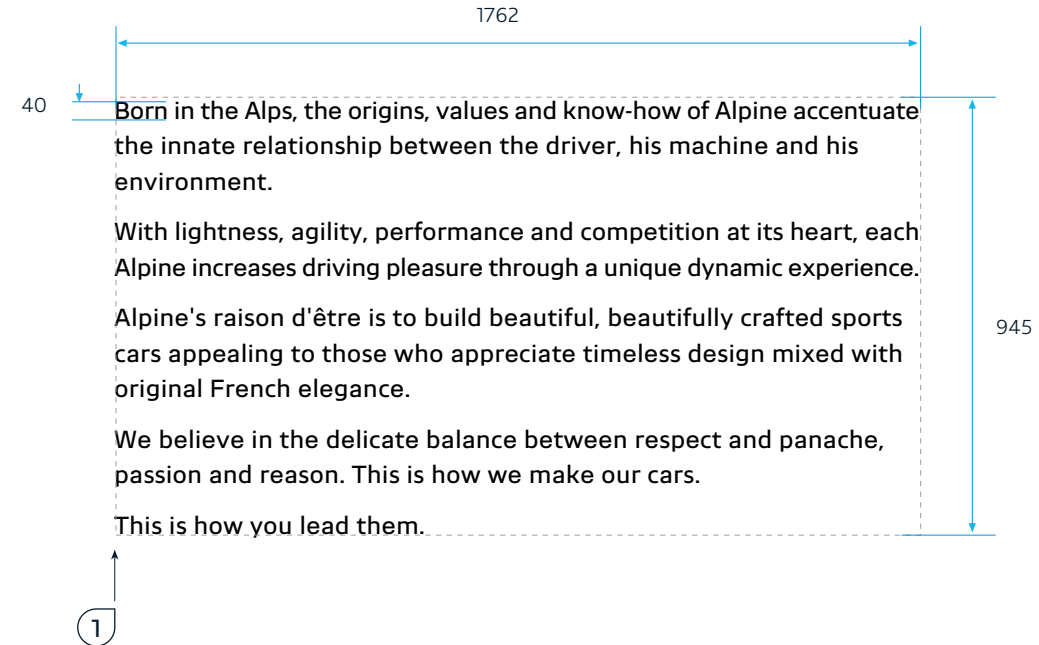

Description

Letters cut from matt white adhesive, ref. 3M 100-10 on midnight blue wall.

Laying in text blocks with transfer film after stripping.

Key

- 1 Right wall,
Alpine Ascension Regular typography aligned on the left.
- 2 Chronological dates,
Alpine Ascension Bold typography centered,
body of text in Alpine Ascension Regular
typography aligned on the left.

the confectioning table

presentation

Description

This furniture includes 4 different modules made on wood frame in particle board with laminate finish.

These modules can be combined in 2 configurations adapted to the surface of the Alpine showroom.

Key

- 1 4-module configuration, consisting of module 1, module 2, module 3 and module 4
- 2 5-module configuration, consisting of module 1, two modules 2, module 3 and module 4.

①

②

the confectioning table

top and front views

Description

Furniture comprising 4 different modules made on a wood frame in particle board finished in Unilin Aneto Walnut H581 laminate.

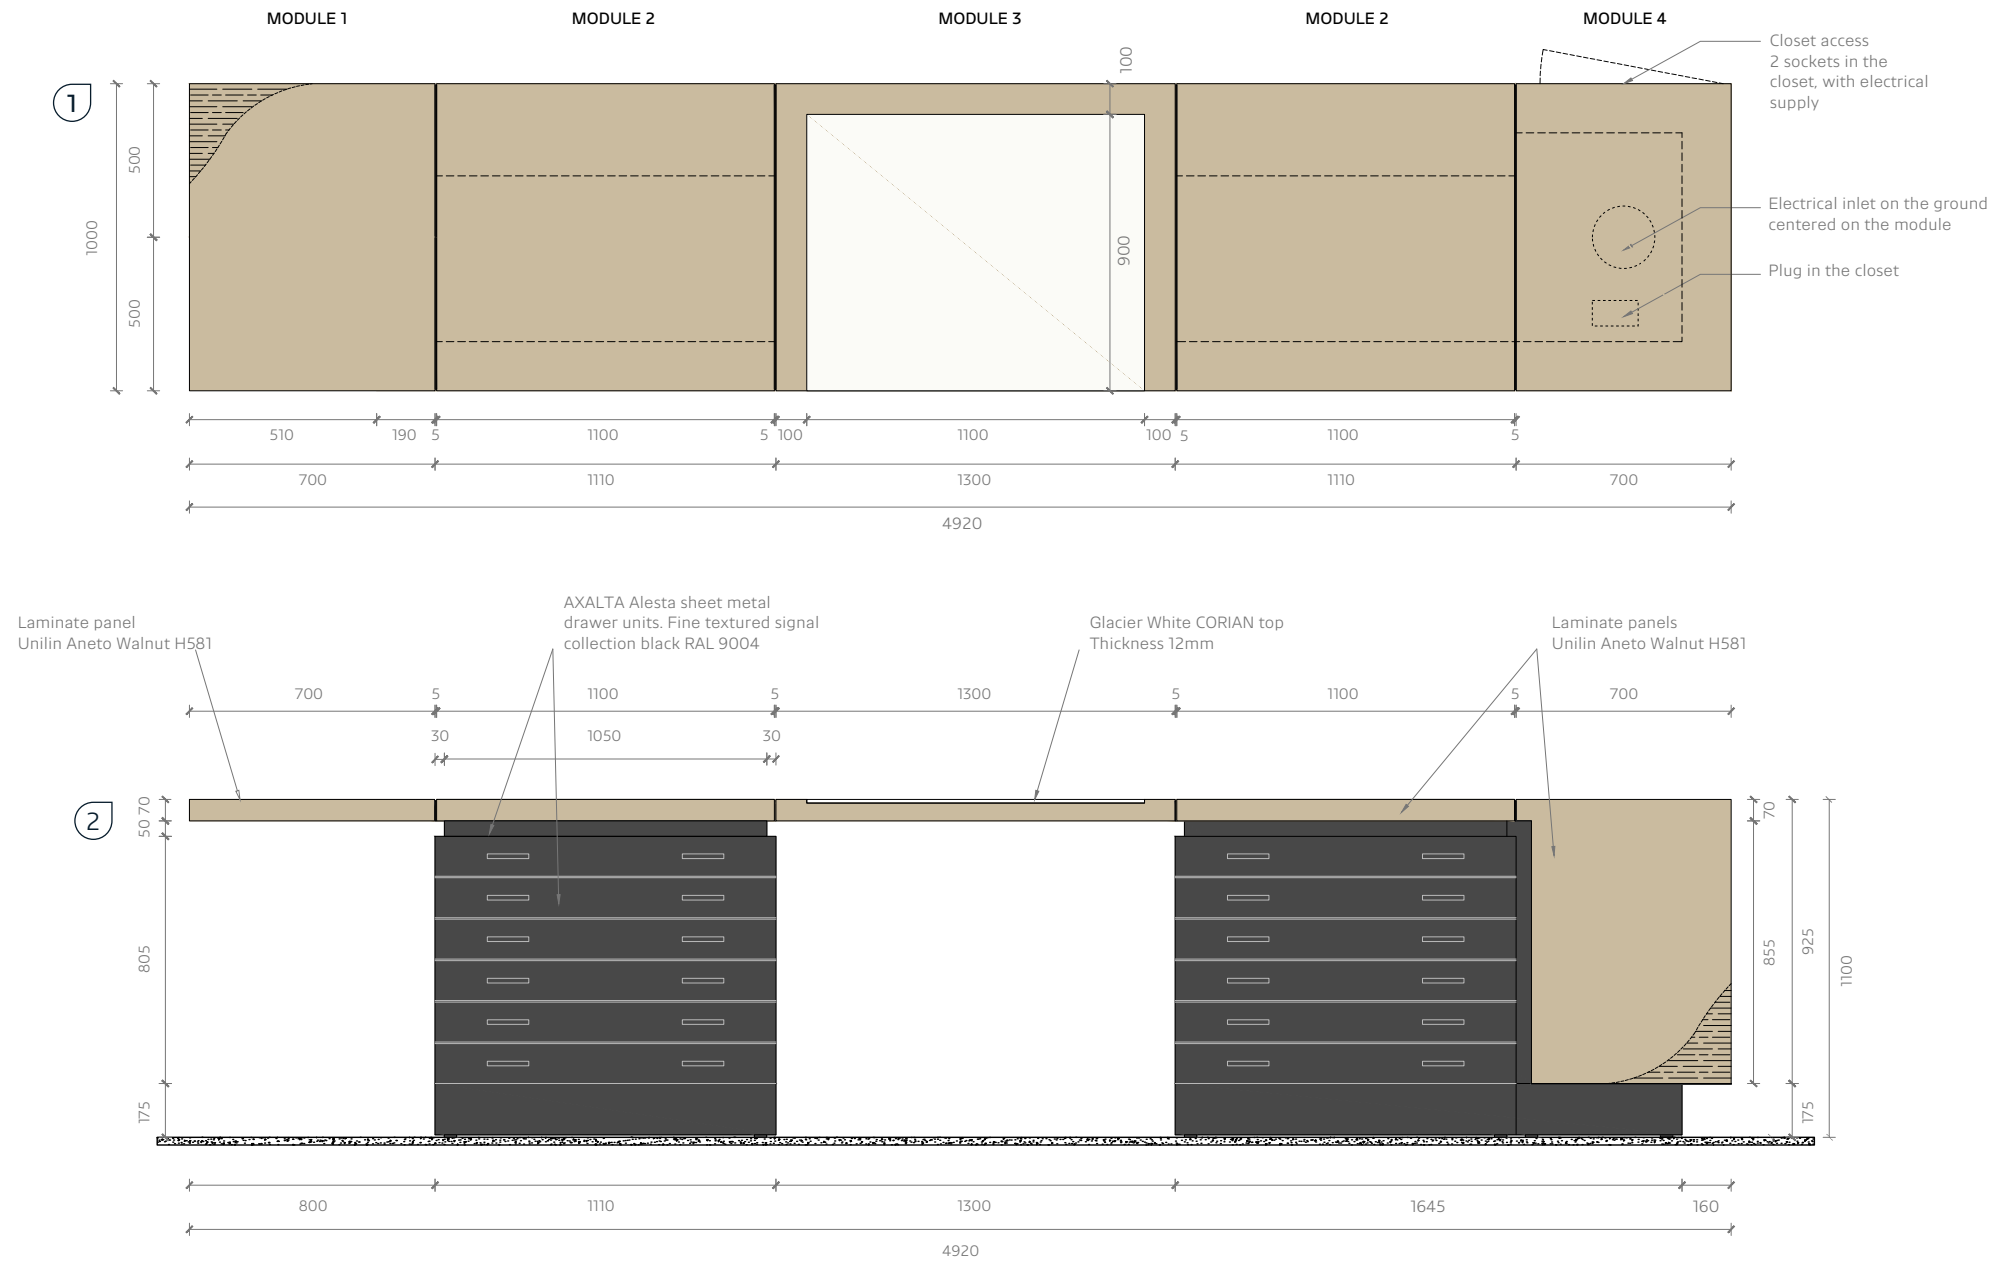

Drawer unit in sheet steel in matt black powder-coated finish RAL 9004.

Dimensions: L. 492 x W.100 x H.73cm.

Key

1 Top view

2 Front view

the confectioning table

side views

Key

- 1 Side view of module 1
- 2 Side view of module 4

the merchandising furniture presentation

Description

The merchandising furniture composed of a basic module made on a wood frame in particle board with a laminate finish.

This module can be associated with a metal rack allowing the presentation of textile articles.

Several modules (1 to 3) can be aligned in order to adapt the configuration to the surface of the Alpine showroom.

Key

1 3-module configuration

the merchandising furniture configuration 1

Description

Display furniture for accessories and goodies that can be combined according to several assembled modules.

- Structure in particle board or MDF.
- Finishing of particle boards in Unilin Aneto Walnut H581 laminate.
- Base in RAL 9004 black lacquered metal
- Dimensions: 110 x 100 x 60cm

the merchandising furniture configuration 2

Description

Display furniture for accessories and goodies that can be combined according to several assembled modules.

- Structure in particle board or MDF.
- Finishing of particle boards in Unilin Aneto Walnut H581 laminate.
- Base in RAL 9004 black lacquered metal
- Dimensions: 220 x 100 x 60cm

the merchandising furniture configuration 3

Description

Display furniture for accessories and goodies that can be combined according to several assembled modules.

- Structure in particle board or MDF.
- Finishing of particle boards in Unilin Aneto Walnut H581 laminate.
- Base in RAL 9004 black lacquered metal
- Dimensions: 330 x 100 x 60cm

the merchandising furniture

accessories rack

Description

This element can be used with each of the accessory presentation modules.

- Shelves in particle board or MDF veneered in Unilin Aneto Walnut H581 laminate.
- Structure in black lacquered metal RAL 9004
- Dimensions: 118 x 96 x 40cm

the office furniture presentation

Description

This furniture is installed against the wooden wall at the back of the showroom, next to the Alpine fresco in the sales area.

It includes the printer made available to the Alpine Advisor and has connections to the computer network and to the general power supply.

Key

- 1 Office furniture
- 2 Printer

the office furniture description

Characteristics

This furniture is installed against a wall in order to be connected to the electrical and computer networks.

It houses the printer.

- Structure in particle board or MDF.
- Finishing of the particle boards in laminate type EGGER U999 PT matt black.
- Base in black lacquered metal RAL 9004.
- Dimensions: 180cm x 55cm x 73cm.

the visual shelf presentation

Description

This shelf supports the visuals described on page 33.

It has a vertical edge preventing the visuals from falling by sliding.

It is made of MDF in a matt black finish.

It can be fixed either directly in the BA13 wall or in the wooden wall cladding near the back of the showroom.

In all cases, its fixation is invisible (without a support device).

- RAL 9004 black lacquered MDF.
- Dimensions: 1200 x 420 x 22mm.

steel.
Lacquered aluminum.

Black marble

the reception furniture

the welcome table

Description

Oval table with a black painted steel base and a black marble top.

Brand	Tacchini
Collection	Split
Designer	Claesson, Koivisto, Rune
Dimensions	H. 75 x L. 180 x D. 110 cm.
Material	Black marble tray
Base	T09 black lacquered steel

the reception furniture

the Lottus Enea high chair

Description

Fixed or swivel, the Lottus High spin chair has a 5-legged structure in black lacquered steel and has an upholstered seat finish.

Black lacquered aluminum armrests provide additional comfort to the seller.

Brand	Enea
Collection	Lottus
Designer	Lievore Altherr Molina
Dimensions	L. 63 x H. 84 x D. 54 cm
Seat height	45 cm
Finish	Camira Urban black fabric finish for the backrest and cushion
Base	Injected aluminum painted black RAL 9005 on castors
Armrests	Injected aluminum painted black RAL 9005

the reception furniture

the Muuto Outline armchair

Description

The Outline series adds new perspectives to classic Scandinavian design furniture from the 1960s, marrying the ideals of simplicity and functionality.

The Outline series is clean and elegant with a deep seat and soft padding of the seat and back.

Brand	Muuto
Collection	Outline
Designer	Anderssen & Voll
Dimensions	L. 88 x H. 70 x D. 84 cm
Weight	28.00 kg
Seat height	40 cm
Finish	Volcano Leather finish.
Base	Black lacquered aluminum

the reception furniture

Conmotto bar stool

Description

This chair by Werner Aisslinger is based on two ideas: on the one hand, the use of the latest materials and technologies, on the other hand, the challenge of creating a timeless piece with a recognizable form.

The shell is made from 100% recyclable fleece felt, a newly developed technology that provides comfortable, plush padding.

Brand	Conmotto
Collection	Chairman
Designer	Werner Aisslinger
Dimensions	L.49 x H. 86 x P.55 cm
Finish	Steel siding in black lacquered
Weight	5.70 kg
Seat height	76 cm

the reception furniture

Vorwerk carpet

Description

With a soft shine and a fluffy feel, PASSION 1003 is a high pile rug that offers, with its texture, a shimmering effect and ensures a comfortable experience in the retail space.

Brand	VORWERK
Collection	Passion 1003 Bella Range
Reference	5V25 with overlocked edges
Class of use	23
Thickness	9.7 mm
Weight	1950 g / m ²
Features	Antistatic and fire resistance (Cfl-s1)
Dimensions	L.400 x W.500 cm

5 showroom

To return to the general summary,
click on the button.

showroom

The shell

Principle

The average layout is 120 m².

GENERAL DIMENSIONS

Depth	15000 mm
Width	8000 mm
Height	3000 mm / 4000 mm

EXTERIOR

Front in horizontal metallic cladding in midnight blue in satin finish.

Metal carpentry in RAL 9005 black lacquered aluminum in satin finish with clear glass mirrors.

INTERIOR

BA13 load-bearing partitions with matt paint finish.

Unhooked 3 m from the ground with matt black paint and black ceiling.

showroom

exterior joinery

General facts

- Exterior joinery in RAL 9005 class 20 black lacquered aluminum including showroom access doors.
- Mirror in clear colorless glass.

Implementation repository

All joinery to be implemented will be compliant with French standards NF, as well as European standards, EWAA specifications whose application is sanctioned by obtaining the EWAA EURAS label.

- The joinery carried out must comply with standard NF P 24.301.
- The contractor must also comply with DTU 37.1, metal joinery work and DTU 39, Mirroring and glazing work.

Exterior wood furnishings

The profiles will be composed of two aluminum parts mechanically assembled by two continuous insulating bars. The bars will be in polyamide reinforced with glass fiber and provided with an adhesive cord.

The sliding resistance of the bars in the profile will be ensured by a crimping which deforms the profile on the bar. When passing in the oven, the strip will show a slight shrinkage which will be compensated by the melting of the bead of glue.

The width of the thermal break bars will be at least 18.6 mm.

Installation of the glazing

It will be done by means of aluminum glazing beads positioned in the profiles of the frame. The glazing will be maintained by EPDM gasket slipped into an appropriate groove in the glazing beads.

The glazing will be wedged in accordance with DTU 39.4, by a special seal placed in a groove of the upright and cross sections, with the use of wedges to hold the double glazing type BIVER 4/16/4 type glass with 2 STADIP faces.

Aesthetic constraints

In the bottom rail, the frame will act as a support, straightening the profile masses seen horizontally and allowing a symmetrical appearance to be obtained at the perimeter of the structure.

On the outside, the frames and openings will be flush, ensuring perfect flatness of the joinery.

On the inside, the opening profiles will have a 45 ° cutaway to highlight the opening function.

The joint covers will be placed in alignment with the frame.

showroom

horizontal cladding

General facts

The facade must be cladded in horizontal strips of flat metal cladding in midnight blue.

- Pre-painted galvanized steel cladding, thickness 1 to 1.5 mm.
- Color Night blue in satin finish equivalent to Pantone blue 296 C.
- NF EN 10169-1 XP P 34301 certification
- Height of the boards of 40 or 60 cm in horizontal installation without hollow joint.
- Fixing of the slats by concealed screws.

Particularities

- Reinforcement at the level of the flag sign for fixing the latter.
- Hidden passage of the power supplies for the flag sign and Alpine box letters (1 arrival per letter).
- Integration of a fire brigade cutout on the facade.

showroom

floor treatment

General facts

The slabs will all be laid in the same orientation with grain direction perpendicular to the main facade.

- Noname tiles by Novoceram, glazed, 9.5 mm thick.
- Color Dark grey C828 Elegance.
- Certification U4 P4 E3 C2 - R9.
- Foramt of 60 x 60 cm rectified.
- Seals of color equivalent to RAL 7016 grey.
- Installation by double gluing including casting of the joints.

Note

- Pay attention to the position of the ground sockets (vehicles and shaping table) when laying the tiling.
- The plinths will be in black lacquered aluminum (integrator set).

Colour

Implementation

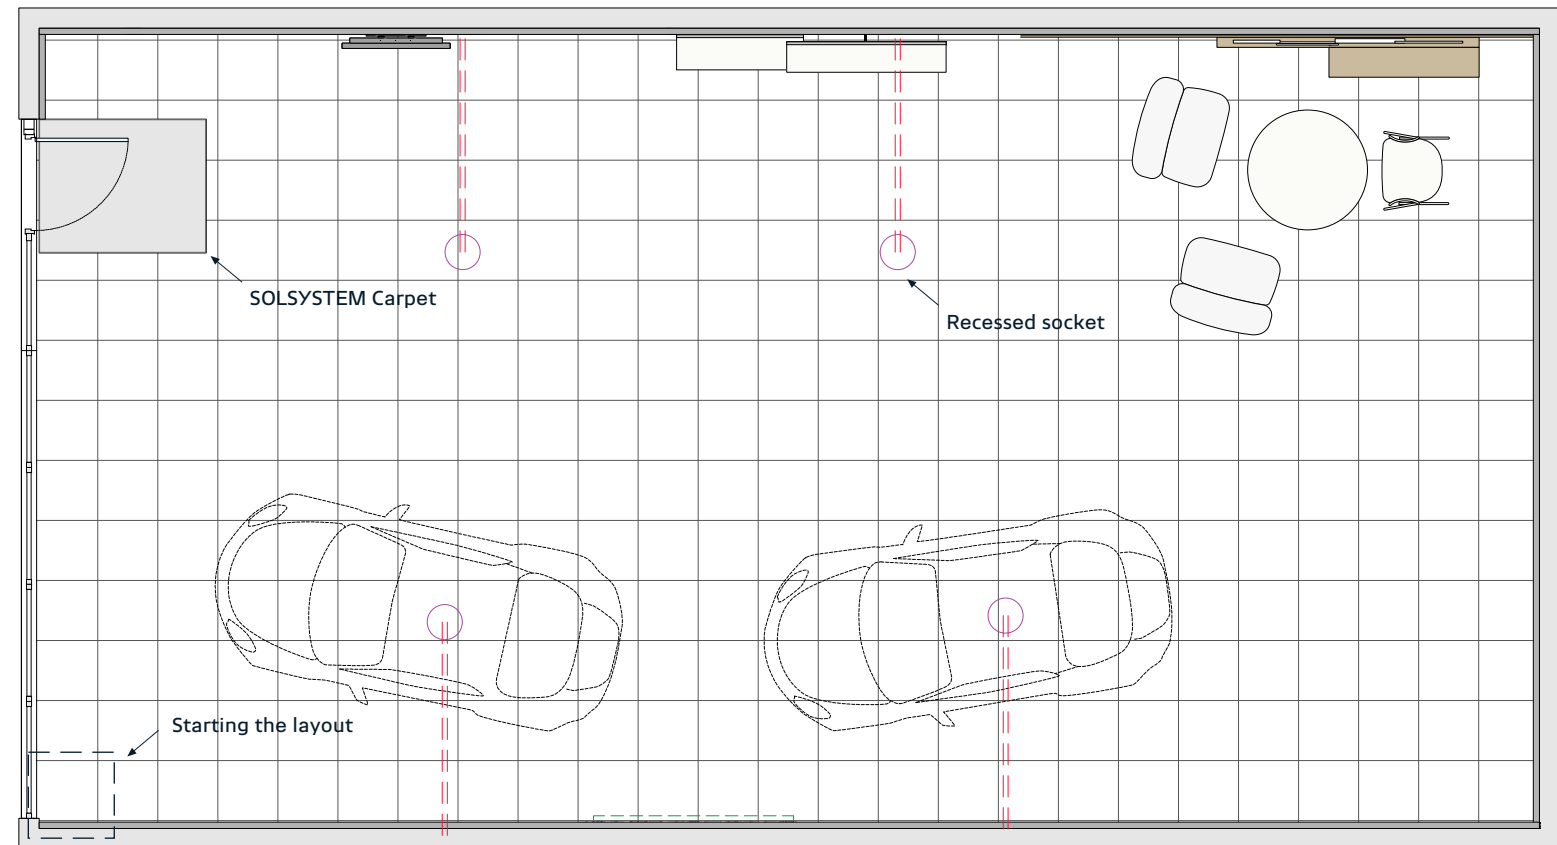

showroom

floor treatment

Standard floor plan

The starting point for the layout of the soil is in principle located:

- near the window,
- in the angle of the vehicle display.

showroom

wall painting

General facts

- Primer painting on BA 13.
- Intermediate sanding
- Finishing paint:
 - Matt acrylic 2-layer ceiling in black color
 - Matt acrylic 2-layer walls in LEVIS Sesame grey.

Intervention conditions

Painting works, coatings and similar preparations are only carried out on clean and dust-free substrates, meeting the requirements concerning them, of standard NF P 74.201.1.

They are never carried out in an atmosphere liable to give rise to condensation, nor on frozen or overheated substrates, nor, in general, under conditions which normally activate drying (wind, sun, etc.).

Prerequisites

Walls and partitions delivered with an impression layer suitable for receiving all subsequent finishes (paints, plasters, etc.).

Acrylic paints

Supply and implementation of a finishing paint on coated GS supports or plasterboards, including:

- Revision of the supports by puttying, sanding and dusting.
- 1 primer printing layer.
- 2 coats of acrylic paint in aqueous phase, applied by brush or roller, finish appearance depending on location.
- Finishing joints with acrylic mastic to be painted at the connections with structures of a different nature (joinery, baseboards, etc.).

Fire classification

- AFNOR classification: Family I class 4a.
- Fire classification on non-combustible support: M1.

showroom

wooden wall cladding

Description

MDF wall panels attached to the wall by assembly keys.

- Unilin Aneto Walnut H581 laminate veneer (Horizontal grain direction).
- Counterbalanced panels.
- 5 mm aluminum inserts glued in a groove with 2 mm projection.
- MDF recovery keys on the wall.
- Dimensions: 350 x 300 x 3.6 cm.

showroom

wooden wall cladding

Details of fixing of wood panels on the wall

Details of fixing the panels to the wall using wall keys taken from the rear face of the panels.

- MDF panels.
- Average weight of 28 kg / m².

showroom

electricity

General facts

- Electrical outlets.
- Electric passages and arrivals.

Electric passage

Particular attention will be paid to the cohabitation between strong current and weak current and in particular on the routes in cable passage.

Recessed or flooded installation

The pipes laid in a hidden way will be installed, either under IRO 5 APE tube in recess or under grey I.C.D tube flooded during construction. In both cases, mechanical protection will be provided from the outlet of the embedded or embedded tubes to the inlets of the junction boxes (Capriplast type sheath).

For recessed installation, all implementation work (trenching, filling) is the responsibility of this lot. Recessed or embedded tubes must not include any elbow, square, tees, etc. in order to allow easy replacement of the conductors.

Installation in a removable false ceiling

In general, the pipes will be laid on a cable tray fixed directly to the hull, all the holes, iron and slab being the responsibility of this lot. Attention is drawn to the fact that all holes must be made in accordance with the structural work package.

In addition, close coordination must be made between the different lots such as heating, air conditioning, plumbing,

electricity, weak currents, false ceilings ... in order to establish during the preparation period plans for the passage of ducts, pipes, cable ducts. and all the attachment systems.

Installation in construction vacuum

Under IRO 5 APE or ICD grey tube fixed to the walls so as to allow easy re-referral. Conduit allowing easy replacement of conductors. In these routes, the cables must in no case be fixed to the walls.

Ground sockets

- Type Legrand Ref. 68995626
- Protection index: IP44
- Installation method: recessed
- Automatic terminal: Yes
- Finish: brushed metal.

showroom sound system

Description

- Colour Matt black
- Installation height 350 cm
- Fixing On ceiling
- Wiring Hidden in the wall

300 ICW 8
Fiche Produit

Aimants pour fixation grilles magnétiques. Patins anti-vibratoires.

Poignées d'orientation pour fixer l'enceinte au cadre de montage sans outils.

Tweeter à dôme inversé en Al/Mg 25 mm avec suspension Poron. Aigu plus soyeux.

Médium grave 21 cm
Membrane Flax : neutralité, définition du son.

Protection arrière du produit contre poussières.

Easy Quick Install, montage sans outils, simple et rapide. Système compatible pour mur/plafond d'épaisseur de 5 à 30 mm.

Tweeter orientable. Optimisation de la réponse hors axe.

Réglage du niveau du tweeter -3 dB, 0 dB, +3 dB. Égalisation des aigus en fonction de l'acoustique de la pièce.

Points clés

- Enceinte encastrable coaxiale 2 voies
- Montage du produit sans outil
- Haut-parleur développé et fabriqué en France par Focal
- Livré avec grilles carrées et circulaires et masque de protection
- Contrôle de la réponse hors axe (orientation tweeter et réglage gain)

General facts

A complete interactive display solution, the QMR-T series creates new ways to engage and create a differentiated customer experience.

- Colour Matt black
- Installation height 180 cm
- Wall fixing Vesa 200 x 200
- Wiring Hidden in the wall
- Power supply Hidden in the wall
- Resolution 3840 x 2160 (4K UHD)
- Brightness 500 nit
- Contrast 4000: 1
- Dimensions 1235.1 x 707.9 x 46.3 mm
- Weight 18.1 kg

showroom

carrier partitions

General facts

- Primary framework of walls and ceiling placostil (or equivalent) in accordance with a load calculation adapted to each site
- Walls and Ceilings BA13 or equivalent
- Treatment of band seals + coated
- Tape take-over and non-ironed ceiling finish
- Tape backing and iron-coated finish for the walls.

Implementation

Installation according to the manufacturer's regulations, including accessories, soles, ribbons, rails, etc ... sealing, cutting, finishing, fire classification. The entire complex will rise to a height of 4 m.

Partitions forming any angle between them:

The assembly will be carried out according to the manufacturer's specifications and will be carried out in accordance with these instructions.

Pipelines:

The uprights of the framing are provided with lights for the passage of the electrical and computer conduits.

Loads :

For loads above 30 Kg, vertical reinforcements will be incorporated during the implementation. In particular, the manufacturer must ensure that the expenses related to:

- ceiling lights,
- vertical wall panels,
- signs.

Local flatness:

A rule of 0.20 m applied to the surface of the structure must not show between the most prominent point and the most recessed point a deviation of more than 1 mm, no shortage, no sharp change of plane Between plates.

General flatness:

A rule of 2ml applied to the surface of the work and circulating in all directions shall not cause a difference of more than 5 mm between the most protruding point and the most recessed point.

Verticality:

The vertical clearance must be less than 5 mm over a height of 4 m.

Finishing:

The DTU 59.1 Painting work defined 4 finish states. Careful matt, satin or gloss finish is required.

Dilation:

The Contractor of this lot will be solely responsible for errors and consequences resulting from the normal expansion of these works. To this end, it will compensate by the termination of expansion joints with surface treatment.

Wiring in rail

Suspension rail

showroom

heating and air conditioning

General facts

- Heating and ventilation systems.

Brief description of facilities

The work to be carried out shall include the supply, installation, execution, commissioning, testing and adjustment in accordance with good engineering practice, all works and various general and technical or special plans for heating and the ventilation of the enclosure to be treated.

Type of services expected

The following services are included:

- The provision of calculation notes with thermal balance,
- The establishment and provision of implementation plans,
- The realization of all thermal equipment (Heating and cooling) of the buildings concerned,
- The realization of all ventilation equipment,
- Electrical connections of supplied and installed appliances,
- Piercing and filling in the different walls
- The indication of needs to other state bodies.

Elements to take into account

The company will coordinate all the network equipment to be installed and will take into account in particular the following elements:

- Air-conditioning networks,
- Hydraulic networks,
- False ceilings,
- Beams and structural elements,
- Path of cables,
- Lighting,
- Diffusers and ventilation grilles.

showroom

safety compliance

General facts

- General Standards “ERP Category 5”

The services must correspond to the Prescriptions of official documents in force: laws, decrees, standards, and in particular defined by:

Electrical installation

- Decree No. 88-1056 of 14 November 1988 (protection of workers) and implementing decrees;
- Building and Housing Code (Article R123-43) and the Security Regulations for Establishments Receiving Public (Order of 25 June 1980 - Art. GE9).

Heating and ventilation installation

- Safety regulations in the LES:
A.M. of 23/03/1965 (Articles CH62 and GZ30)
A.M. of 25/06/1980 (articles CH58 and GZ30)
A.M. of 22/06/1990 (Article PE4).

Automatic doors

- Article R232.1.2 of the Labor Code
- A.M. of 21/12/1993 relating to automatic doors.

Fire safety

- Order of 25/06/1980: general provisions
- Order of 22/12/1981: special provisions
Applicable to different types of establishments
- Decree of 22/06/1990: establishments of 5th category.

Accessibility

- The handicap law n°A1 2005-102 of 11 February 2005 and its implementing texts.

6

IT material

showroom

IT material

General facts

The company will be responsible for the supply, installation and connection of new RJ45 connections and sockets in category 6 cabling.

- Wiring integrated with walls,
- RJ45 connection.

Installation Standards (or equivalent)

- NFC 15 100 version 2002,
- NF EN 50174-2 version 2001
- UTE 15 900 rules of installation version 2006,
- DTU (implementation requirement).

Reference standards for wiring

International standards and their French and European equivalents defining the architecture and components of the network:

- EN 50 173-1 2nd edition / ISO 11801-2 °A1 edition
- EIA / TIA 568-B.1-1 and EIA / TIA 568-B.2-1
- NF EN 50288-X multi-element metal cables used for analog and digital transmissions and controls
- EN 55022 EMC.

Reference standards for applications

The standardization of the various computer protocols is as follows:

- ISO 8802.3 for the Ethernet family,
- IEEE 802.3 ab for 1000 Base T, Gigabit Ethernet over copper cable.

- IEEE 802.3 year for 10 gigabit Ethernet over copper cable.
- IEEE 802.3 af and Draft 3.0 802.3 at for Power over Ethernet (POE) and Power Ethernet Plus (POEp).

RJ45 Connector

The RJ45 connectors will have the following characteristics:

- Equipped with a multi-directional rear cover (lateral or axial) to adapt the radius of curvature of the cable,
- 4 inserters for fast and secure connection

By mechanical locking,

- Connection without tools,
- Blue dust cover for phone and grey for computer,
- Metallic contact for ground connection on the panel,
- Faraday cage integrated in the engine,
- Assembly on existing patch panel.

They will be of type "MK6 FS" of CAE GROUPE or equi worth.

showroom

IT material

General facts

The company will be responsible for the supply, installation and connection of new RJ45 connections and sockets in category 6 cabling.

- Wiring integrated with walls,
- RJ45 connection.

Horizontal service cables

The cables used for pre-wiring will be twisted pair pairs (U / FTP) with impedance 100 Ohm, their bandwidth will be characterized up to 500 MHz and their sheath will be halogen-free.

The cable will be certified by a recognized laboratory.

The cables will be compatible with IEEE 802.3.

The technical characteristics of the U / FTP cables will support applications such as Gigabit Ethernet, 10 Gigabit Ethernet, VOIP (Voice over Internet Protocol), POE (Power over Ethernet).
